

MAKING A DIFFERENCE IN EDGE PROTECTION
ECO PROTECT™

MORE THAN THE CORE

Corenso is an established manufacturer of high-quality edge protectors. We also manufacture high-quality coreboard and high-performance cores in 10 countries worldwide. Corenso's geographical spread allows us to guarantee deliveries – our goal is to ensure the best quality in both products and services.

edgeboard by

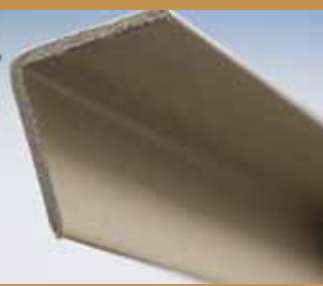

Corenso products are made from our own raw materials produced in the world's largest and most technically advanced board mills. The stable characteristics of our board have been achieved by integrating modern technology with decades of board-making experience, resulting in the outstanding durability of Corenso edge protectors. Having full control over the sources of raw material used for board manufacturing guarantees that our products are clean, safe and free of contaminants. Corenso's operations are systematically based on the principle of continuous improvement, and we are certificated to ISO 9001:2000, ISO 14001 and OHSAS 18001, BRC/loP and HACCP standards.

Corenso's sales network is committed to offering a technically superior and profitable product for each individual customer. Our customers can count on our expertise in edge protector manufacturing for all end uses. Customised operations and just-in-time deliveries backed by innovative R&D and comprehensive customer service make Corenso a high-performance partner.

Corenso's skills in recycling technology are known throughout the world. Having our own recycling plants makes us a unique partner in taking service a step further and tailoring recycling solutions for our customers. Because we guarantee 100% recyclability, our customers enjoy reduced disposal costs and can be confident that their products and process have a minimal impact on the environment.

Specialised technology, hands-on know-how, and continuous research and innovation are keys to meeting our customers' performance requirements.

Corenso's Brand, ECO Protect™, stands for unique added value for the customer – total ecological protection!

ECO PROTECT™

ECOLOGICAL TRANSPORT PROTECTION

Corenso's family of edge protection products manufactured under the ECO™ trademark means an ecological approach to protecting what is valuable for you!

ECOLOGICAL

Our product slate includes an extensive range of edge protectors that **strengthen packaging and protect goods** during transport and warehousing. Your product will be protected against any possible damage during handling and loading by combining edge protectors in both the horizontal and vertical direction. Your product will achieve better stacking stability, thereby helping to maximise storage space.

Corenso's variety of protective packaging covers all surface finishes and includes colours printed to your specification, providing you with **originality** and ensuring **high visibility** of your products, thus bringing additional point-of-sale opportunities.

All of our products can be made **weather resistant**, which guarantees safe arrival no matter where your customer is located. Another feature of our service is the ability to notch ECO Protect™ to ensure complete protection of any radiused surface or

circumference.

Following major investments in edge protection technology backed by extensive know-how in logistics, Corenso has the **flexibility of just-in-time deliveries** to minimise the costs involved in the supply chain. State-of-the-art production facilities throughout Europe allow Corenso to make a difference to our customers by providing superior and consistent quality.

All of the board used for ECO Protect™ is supplied by Corenso's own board mills, which utilise **state-of-the-art** recycling

TRANSPORT PROTECTION

technology. This guarantees **consistent quality** and availability of raw material. The base for Corenso's edge protectors is recycled raw material, and that makes the end products recyclable as well.

Our ECO Protect™ family includes different product types, giving you complete flexibility in your packaging process.

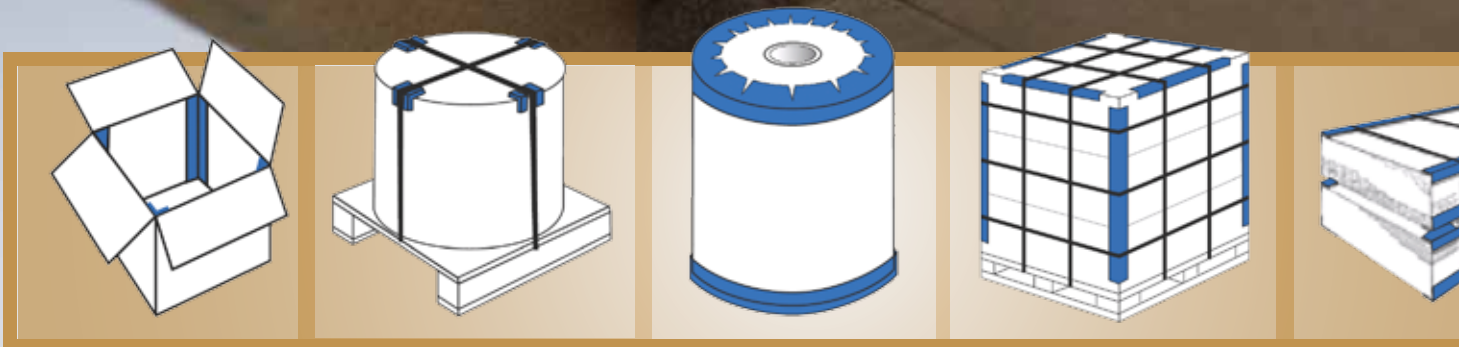

THE SOLUTION

Proper edge protection will give you and your customers greater peace of mind. It will ensure that goods arrive at their destination as they left your premises – in perfect condition. Replacement consignments can truly become a thing of the past.

THE PRODUCT

Corenso ECO Protect™ offers complete protection. Our ECO Protect™ products are extremely rigid and robust in use, capable of withstanding more impact and stresses than edge protectors made from other materials. We recognise that superior strength is vital in warehouses both your own and your customers' and, of course, during transport.

SPECIFICATIONS

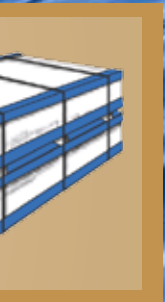

PRODUCT RANGE

- ECO Protect™ can be supplied notched on one face, to cope with irregularly shaped items – i.e. drums, plastic mouldings, etc
 - Cut to short lengths, they serve as protection from high point loading with steel or plastic strapping – thereby enabling higher strapping tensions
 - Available in standard lengths from 50 mm to 4 metres
 - Longer lengths and special profiles can be supplied to order
 - ECO Protect™ edge protectors are made to order; however, some profiles are kept in stock
 - The standard finish is grey/brown, with both edges fully wrapped
- Also available in white and poly coated for weather resistance
 - Company names, logo's and colours can be added to personalise ECO Protect™, which gives high visibility to your packaging and sets your product apart, making its appearance truly unique
 - Can be supplied with an adhesive strip to ease final positioning during your process

APPLICATIONS

explained in the following illustration

STANDARD SIZE (mm)		
a	b	c
35	x 35	x 2-4
50	x 50	x 2-5
60	x 60	x 3-6
75	x 75	x 3-6

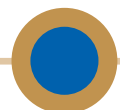

RECYCLING

Corenso products and processes are based on the principle of recycling. Corenso emphasises the use of recycled raw materials and recyclable, environmentally-friendly end products as vital elements of its company vision.

Through Corenso's activities worldwide, we have learned that ecological means economical for everyone. More than 90% of Corenso's basic raw material is recycled wood fibre; the additional fibre comes from sustainably managed forests. We are pioneers in processing used liquid

packaging cartons and plastic laminated paper wrappings.

All Corenso's products – coreboard, cores and tubes – are fully recyclable.
